How to view release notes and announcements

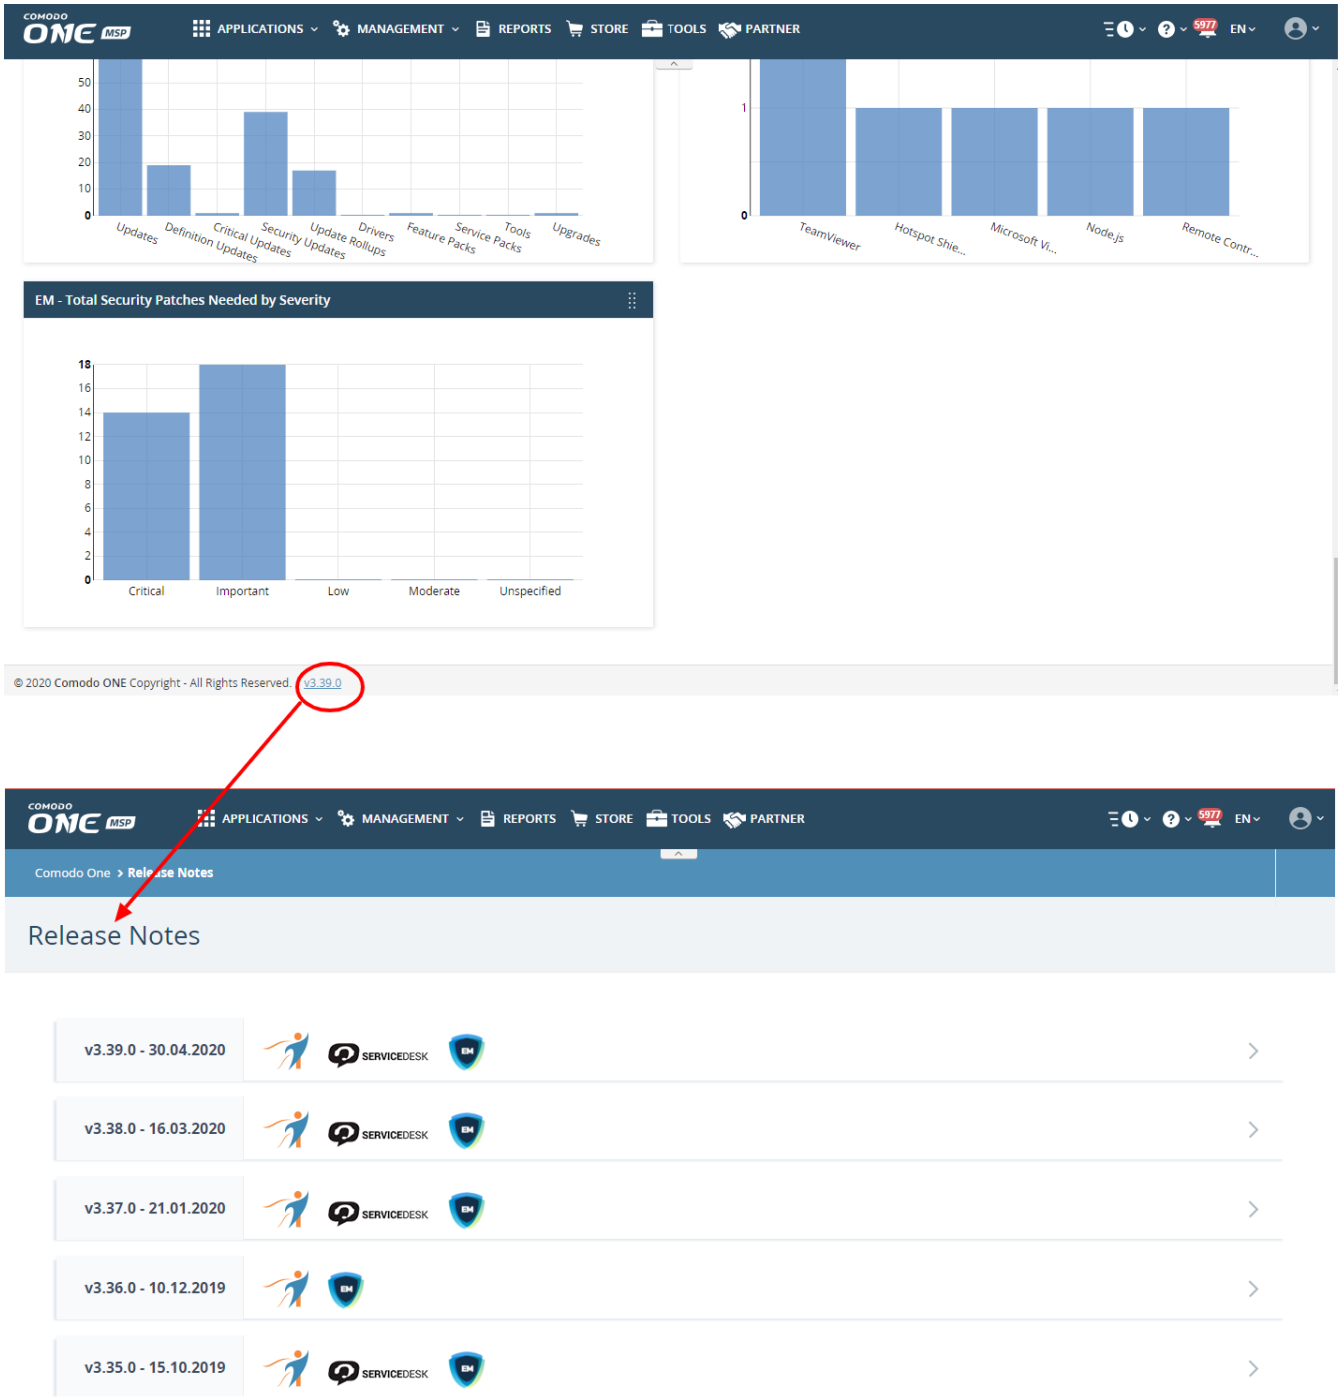
- Release notes outline the new features, improvements and bug-fixes in a specific version of Comodo One / Dragon

View release notes

View announcements

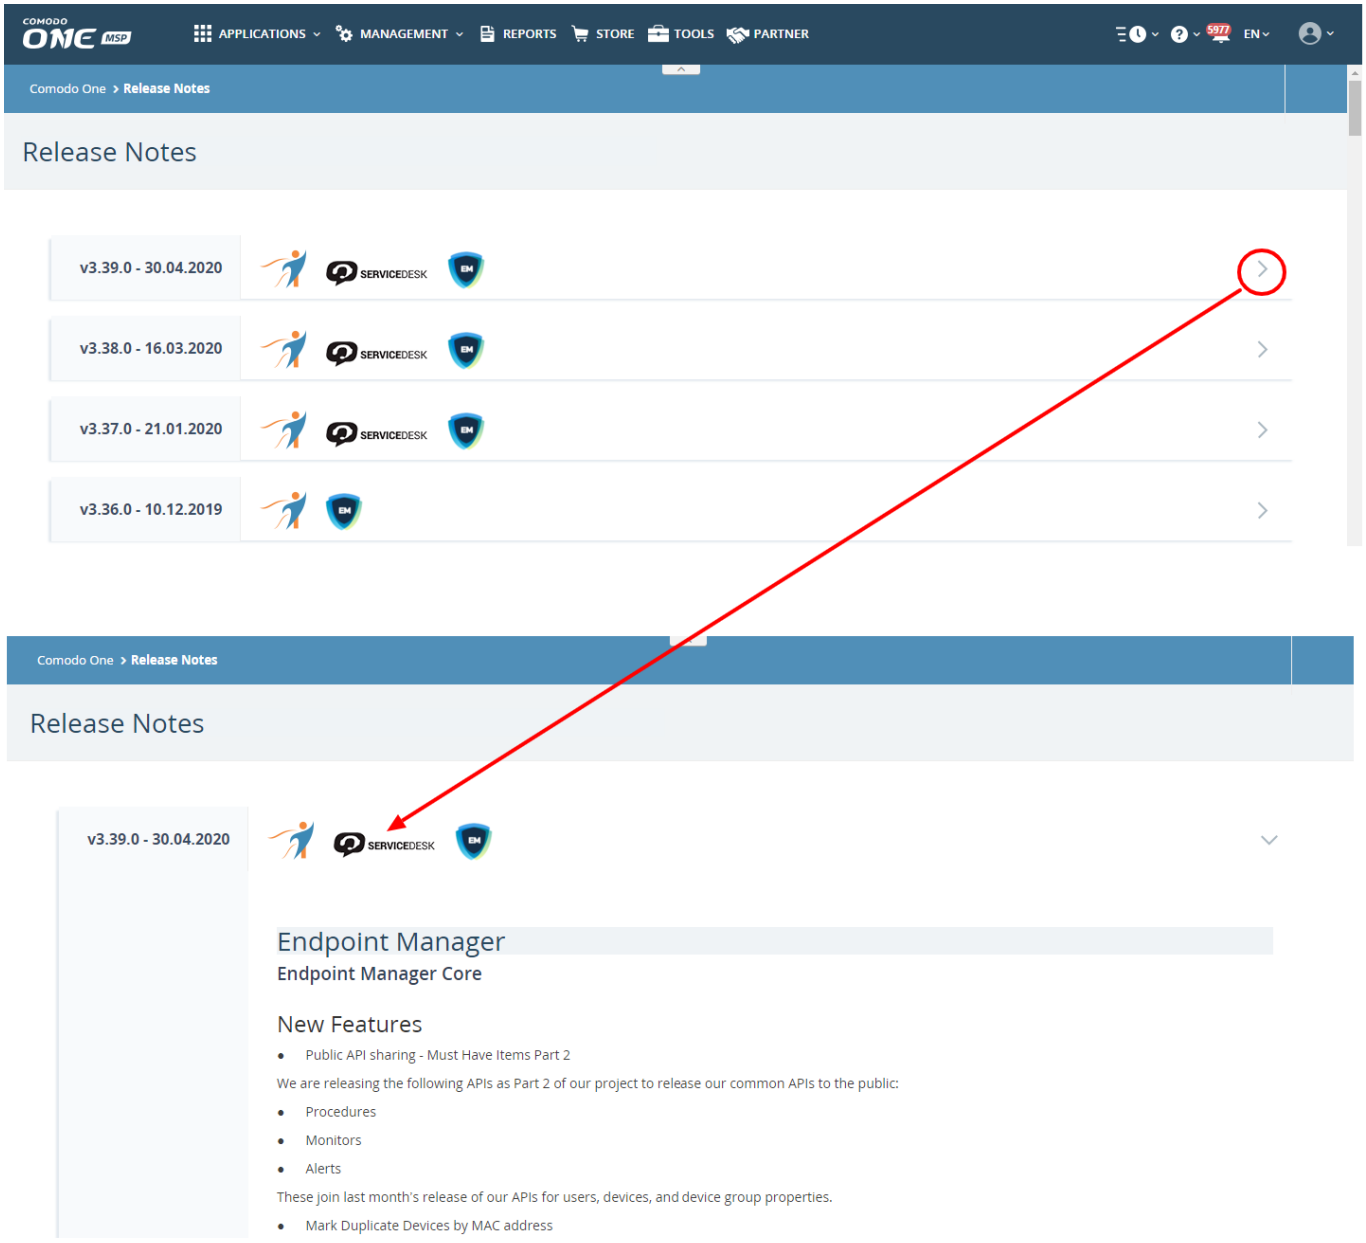
View release notes

- Login to Comodo One / Dragon
- Scroll to the bottom of the dashboard
- Click the version number in the footer:



The menu page shows release notes for all previously released versions, with the current version at the top.

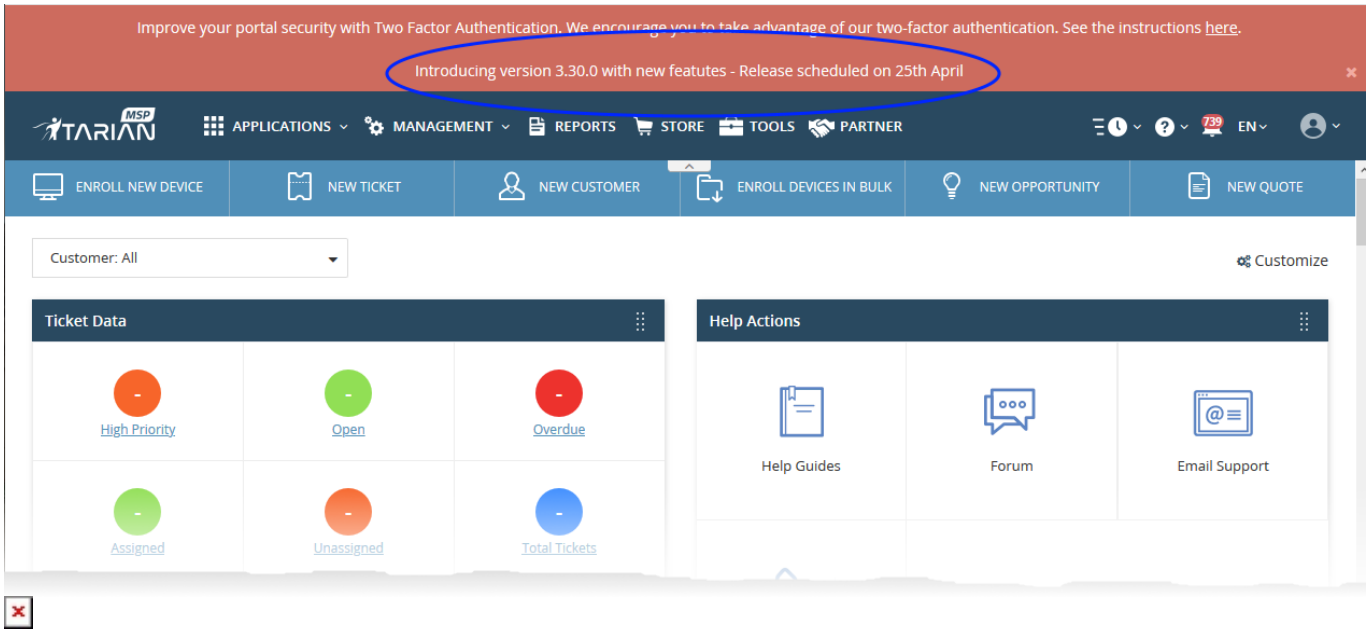
- Click the arrows on the right to view the full notes for the version:



View announcements

- Login to Comodo One / Dragon

The orange banner at the top shows announcements about upcoming releases and scheduled outages:



- Click the banner to view the full announcement.
