

How to configure Valkyrie in macos and Linux profiles

Valkyrie is added in the profile section for both mac and linux.

When CCS detects an file with an unknown rating, it will upload the file to Valkyrie for behavior testing.

The test results will tell CCS whether the file is trustworthy or malicious. CCS can either allow or block the file.

To configure valkyire in macos and linux profiles

Note:

For valkyire to work in linux - need to enable the cloud scanning option which is under antivirus section in profiles.

General Valkyrie **Antivirus**

Antivirus

Scanner Settings Scan Profiles Scheduled Scans

Realtime Scanning **Manual Scanning** Scheduled Scanning Exclusions

Do not scan files large than (MB) *

20

☒ Scan archives files (e.g. *.zip, *.rar)

☒ Automatically update virus database before scanning

☐ **Enable cloud scanning**

☒ Enable heuristic

Heuristics scanning level

Low

Step [1]: Go to Endpoint Manager > CONFIGURATION TEMPLATES > Profiles

Select the macos or linux profile which needs valkyire.

For example: Here we are selecting mac profile named "new mac"

OS	NAME	CREATED BY	CREATED	UPDATED AT
lin	lin	stephenrobert778@gmail.com	2019/04/01 04:28:02 AM	2019/04/01 04:28:02 AM
new mac	new mac	stephenrobert778@gmail.com	2019/04/01 02:55:08 AM	2019/04/01 02:55:08 AM
	Security profile	stephenrobert778@gmail.com	2019/02/07 01:21:33 AM	2019/03/26 02:04:27 AM
	Profiles for UI settings	stephenrobert778@gmail.com	2018/12/27 08:38:25 AM	2018/12/27 08:52:15 AM
	[cloned] Windows - Security Level 1 Profile v.6.23 vicky	stephenrobert778@gmail.com	2018/10/31 03:17:02 AM	2018/10/31 03:17:44 AM
	[cloned] Windows - Security Level 1 Profile v.6.23	stephenrobert778@gmail.com	2018/10/31 03:15:53 AM	2018/11/30 02:48:35 AM
	hhhh	stephenrobert778@gmail.com	2018/10/22 05:18:09 AM	2018/12/27 07:53:54 AM
	cccc	stephenrobert778@gmail.com	2018/10/16 05:23:52 AM	2018/10/25 01:49:57 AM

Step [2]: Click Add Profile Section and select "Valkyrie"

Endpoint Manager Profiles / new mac / General

new mac

Add Profile Section
