

How to view the New Infection Detected in a device via Email alert

Endpoint manager has the feature of viewing the new infection detected in a device via Email alert. The email alert consists of newly infected device name and the "Follow the link to see details." option to view the malware that caused the infection.

Infected Device Name - The email has infected device name. By clicking the device name, the users can get the Device summary information.

"Follow the link to see details" - To see the details about the New Infection, click the "link" . This link will redirect the user to the malware that caused infection in the device. The details of OS, Device name, application name, package name, file path, file hash, signature, detection date about the malware are available in the Current Malware list.

This feature is explained with a below example:

A New Infection Detected in a device is sent to a user email.

When the user clicks the infected device name "DESKTOP-ETJM9P5" in the email, it will redirect the user to the infected device's summary information.

The infected device's ("DESKTOP-ETJM9P5") Summary Information is given below

The screenshot shows the Endpoint Manager web interface. The left sidebar contains navigation options: DASHBOARD, DEVICES, Device List, Bulk Installation Package, USERS, CONFIGURATION TEMPLATES, NETWORK MANAGEMENT, APPLICATION STORE, APPLICATIONS, SECURITY SUB-SYSTEMS, LICENSE MANAGEMENT, and SETTINGS. The main content area displays the summary for device 'DESKTOP-ETJM9P5'. The device name is highlighted with a red box. Below the device name, there are icons for various actions: Manage Profiles, Remote Control, File Transfer, Remote Tools, Run Procedure, Install or Manage Packages, Refresh Device Information, Power Options, Export Security Configuration, and More. The 'Summary' tab is selected and highlighted with a red box. The summary is divided into two columns: 'Device Summary' and 'OS Summary'.
