

How to view the version numbers of Endpoint Manager platform and clients

Click 'Settings' > 'Support'

- The support page lists contact details to get help and support for Endpoint Manager through various channels.
- The page also shows the current version of the Endpoint Manager portal and the latest version of communication and security clients available for different operating systems.

View version information

- Login to Comodo One / Dragon
- Click 'Applications' > 'Endpoint Manager'
- Click 'Settings' > 'Support'

The screenshot shows the 'Support' page in the Endpoint Manager interface. The left sidebar contains a menu with 'SETTINGS' and 'Support' highlighted. The main content area is titled 'Support' and contains three columns. The third column, 'Latest Platform and Client Versions', is highlighted with a red box and contains the following data:

Latest Platform and Client Versions
